Sean et al...

Enough is enough. It's time the planning board takes a solid stance and protects the beautiful historic architecture of Munjoy Hill. It's a travesty to see perfectly good homes being demolished to make room for pricey 'modern' structures devoid of character and dwarfing the neighborhood homes that have made Munjoy Hill so special for generations.

The precedent was set with the obnoxious 118 Congress that should serve as a symbol for all that is NOT in keeping with the character of the neighborhood.

I encourage you to pay thoughtful attention to the history & character of this once working class neighborhood. Preserve the architecture, adhere to height restrictions, encourage historic restoration and maintain the character & charm of Munjoy Hill.

My grandparents settled here in the early 20thc, I was born here, I live here now. The time for you to act to save the hill is now. Throughout my lifetime we've mourned the loss of structures like Union Station. Do what's right to ensure that the character of the hill remains and that we won't someday be lamenting about what once was.

Thank you for your thoughtful consideration and positive actions.
