City State Zip Code

Phone #: ( ) - E-mail Address: \_\_\_\_\_

Agent/Representative

Name: \_\_\_\_\_  
Last First M.I.

Mailing Address: \_\_\_\_\_  
Street Address Apartment/Unit #  
City State Zip Code

Phone #: ( ) - E-mail Address: \_\_\_\_\_

Credit Information		
Applicant seeking credit for (check applicable):	<input type="checkbox"/> Existing Controls	<input type="checkbox"/> Proposed Controls
Total Impervious Area	_____	square feet
Existing Billing Units (before credit)	_____	BU
Treated Impervious Area (existing and/or proposed)	_____	square feet
Credit Value	<input type="checkbox"/> 0.5 Billing Unit	<input type="checkbox"/> 1 Billing Unit
Final Billing Units (Existing BU - Credit Value)	_____	BU
Structural Control Information (as Applicable)		
<b>CISTERN</b>		
Impervious area treated	_____	square feet
Cistern volume	_____	cubic feet
<b>DRY WELL</b>		
Impervious area treated	_____	square feet
Diameter of seepage tank unit or perforated pipe	_____	inches
Height of seepage tank unit or perforated pipe	_____	inches
Outermost diameter of stone buffer	_____	inches
Outermost height of stone buffer	_____	inches
<b>MODIFIED FRENCH DRAIN</b>		
Impervious area treated	_____	square feet
Diameter of perforated pipe	_____	inches
Length of gravel trench	_____	inches
Width of gravel trench	_____	inches
Height of gravel trench	_____	inches
<b>PERMEABLE PAVERS</b>		
Impervious area treated	_____	square feet
Surface area of permeable pavers	_____	square feet
Depth of #8 stone	_____	inches
Depth of #57 stone	_____	inches
<b>RAIN GARDEN</b>		
Impervious area treated	_____	square feet
Surface area of rain garden	_____	square feet
Ponding depth of rain garden	_____	inches
Soil drains greater than 3.5" of water in 24 hours	<input type="checkbox"/> YES	<input type="checkbox"/> NO

**Sketches**

The applicant must submit a sketch (or sketches) meeting the following requirements. For existing structures, sketches must reflect existing conditions; for proposed structures, sketches must depict what the applicant intends to install.

**General requirements:** applicants must show atop scaled aerial imagery the approximate location of property lines, surface and building impervious area, locations of structural controls, overflow paths of structural controls, location of any piping, and pipe daylight locations. The applicant must also indicate what impervious area drains to each structural control.

**Control-specific requirements:** applicants seeking credits for a dry-well, modified French drain, or and/or permeable pavements must submit a simple cross-sectional sketch to depict the depth of associated materials and pipes/tanks.

**Photographs**

The applicant must submit photos of the site(s) where he or she has constructed or intends to construct structural controls. Photos of the construction process are encouraged as well.

**Residential Credit Approval Disclaimer**

Conditional approval of residential stormwater credits by the City of Portland does not guarantee the functionality of the installed stormwater management system (e.g.: Rain garden, dry well, cistern, ect.). Design, construction and maintenance of residential stormwater management systems is the sole responsibility of the landowner. No residential stormwater management system shall alter or otherwise adversely impact the shared drainage system of a neighborhood subdivision. The City of Portland shall not be held liable for improperly designed and/or constructed systems that fail and/or cause disturbance on a landowner’s property or abutting properties, including the public right-of-way.

**Applicant Signature**

I hereby certify that I am the owner of record of the named property, or that the owner of record has authorized me to submit this application on his or her behalf. I agree to conform to all applicable laws of the City of Portland. In addition, I understand that the City of Portland Department of Public Works has the authority to enter and inspect all areas that pertain to this application at any reasonable hour to verify that the information contained in this form is accurate.
